Doctoral Training

Our aim is to give regular courses to students and prepare them for obtaining a scientific degree, and to offer them teaching experience in higher education.

The objective is to train computer science and info-communication technology experts with professional knowledge based on solid theoretical background.

The ELTE Doctoral School of Informatics provides PhD education in four doctoral programs:

[Doctoral Program of Software and Computer Science](#)

ELTE Informatics

HU EN

Duration of the programme: 8 semesters

Type of the programme: full-time education

Finances: limited number of state scholarships, otherwise tuition fee

Entry requirements: MSc degree and entrance examination

Language requirements: one complex (B2) intermediate level state-accredited language exam
