Enrolment

HU EN

Before enrolling, please carefully read the [ELTE University Doctoral Regulations](#) and the [ELTE Organisational and Operational Regulations \(Volume 2, Academic Regulations for Students\)](#), which contain the university and faculty-level regulations of the doctoral training.

The regulations provide information on the credits to be completed during the training, the conditions for semester registration and successful completion of semesters, the conditions for obtaining the absolutorium and the doctoral degree acquisition procedure. The special provisions concerning the Doctoral School of Informatics can be found in Annex 6/3 of the ELTE University Doctoral Regulations.

Students may postpone the start of their studies after enrollment. You can read more about the conditions for postponement and interruption of the students status in the [Interruption of the Student Status](#) menu.

In the study plan to be submitted during enrollment, doctoral students must detail how they plan the acquisition of the credits required for the absolutorium during the training (240 credits are mandatory). The amount of credits to be obtained from study (course completion), research and possibly teaching activities must be stated in a semester breakdown.
